Subject: Re: Diamond K Seed Mix

Paul: It sounds like a logical solution; no problem here. CC

Chris--

Clint Henrie called and said his seed supplier cannot get any shadscale right now. It should be available in about two weeks, but Clint is anxious to seed now. The supplier asked if he could add fourwing saltbush instead, and I said to go ahead. Fourwing saltbush grows in the area all around the mine, and it's also growing in the disturbed area. Let me know if this is a problem.
